

TERCOO Rotating Blasting Discs

TERCOO Rotating Blasting Discs

RMN Official distributor for Tercoo in the Marine and Offshore

Tercoo discs are used for removing dirt, rust, paint etc. from different surfaces as metal, iron, concrete and stone.

The result after the surface preparation is the same as shot blasting up to SA2,5-SA3,0 and 75 micron profile.

There are two different possibilities in Tercoo discs. One are the versions to use on an electric or pneumatic drill with the 6mm shaft. The other is to use in combination with the special developed Tercoo machine with an M12 threaded spindle.

The best result will be reached with a rotation speed of 2500-3000 rpm or on difficult to reach areas such as corners at 1200 rpm. The single layer disc is for small spots. For larger surfaces there are multiple layer discs.

The Tercoo Multi machine is fitted with a M12 spindle thread for safety.

The Multi-disc cannot be used on an angle grinder due to its speed which is too high.

TERCOO®

Article No.	Description	IMPA
620100	Tercoo single layer disc for rotary drill 6 mm shaft	-
620101	Tercoo double layer disc for rotary drill 6 mm shaft	-
620102	Tercoo triple layer disc for rotary drill 6mm shaft	-
620230	Tercoo Dust Cap for rotary drill machine	-
620200	Tercoo Multi machine 230V 50/60Hz M12 without Tercoo disc	-
620201	Tercoo Multi Machine 110V 50/60Hz M12 without Tercoo disc	-
620205	Tercoo Multi 8-Dust extraction guard, Ø50 mm hose connection.	-
620110	Tercoo Multi 8 disc for Multi Machine	-
620111	Tercoo Spare single replacement disc for Multi 8 disc to replace disc (1, 3, 5 or 7)	-
620112	Tercoo Spare single replacement disc for Multi 8 disc to replace disc (2, 4, 6 or 8)	-
620113	Tercoo spare hexagon shaft M12 for Multi 8 disc	-
620114	Tercoo spare retaining ring for Multi 8 disc (needed per disc)	-
620110C	Carbon brushes for Tercoo Multi Machine	-
