DENFOIL CATALOGUE 2012 Explanation signs IMO resolution A952

In the new IMO regulation valid from 2000 it is important to order the fire control symbols in the right colour according to the IMO resolution A 952 (23).

For the ventilation signs there are 3 different colours with a letter:

A = For Accommodation with the colour BLUE
M = For Machinery with the GREEN
C = For Cargo with the colour YELLOW

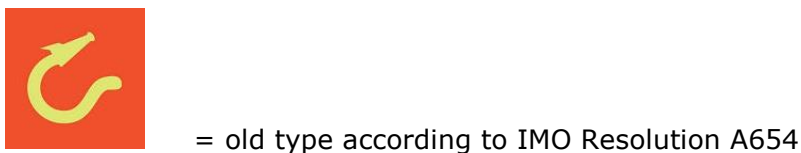

For Fire doors we have 3 options:

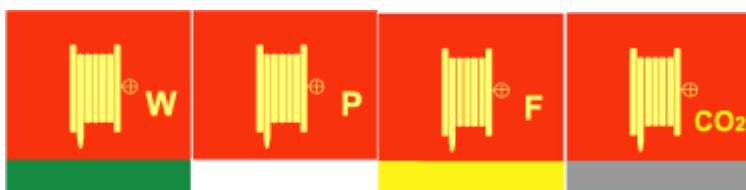

Without text = a standard (sliding) door
With text WT = Watertight (sliding) door
With text SWT = Self closing watertight (sliding) door

For the hose box with spray/jet fire nozzle no longer the standard red one:

W = Water colour red with GREEN
P = Powder colour red with WHITE
F = Foam colour red with YELLOW
CO² = CO² colour red with GREY

The same colours comes back in the signs for the Fire equipment batteries/bottles.

Space protected by signs also have different colours

Fire extinguishers also have the same colours and letters.

Possibilities are signs which have also the indication of the capacity or signs without this indication.

In the 2012 Denfoil catalogue you will find all those signs from page 19 till page 28.

The showed signs are a few examples more types are at above described pages.

DENFOIL MARITIME®

It is possible to order with the IMPA or ISSA number.

All Denfoil Photoluminescent signs are printed on high quality 3M foil.

With kind regards,

Repair Management Nederland BV Sales Team
