

## DRIL HAVIVIE

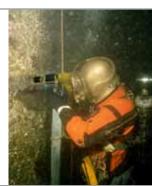

EGA Master hydraulic jackhammers are designed to drill very resistant and hard surfaces in underwater environments.

Indispensable for drilling hard or really thick materials!

1. Essential to drill materials such as concrete, brick, stone ... that conventional drills would not be able to bore. The rotation is accompanied by a hammering movement that causes the rupture of the material and allows the bit's advance facilitating the hole making.

- 2. Equipped with a safety clutch that protects against overloads and blockages.
- 3. SDS-Max System

4. Pivoting side handle and the second handle position.

## TECHNICAL SPECIFICATIONS

Working pressure	80 Bar
Туре	Hydraulic
Impacts per minute	2300
Capacity	50mm (concrete) / 80mm (masonry)
R.P.M	270 rpm
Power	1,2 kw
Oil flow	15-45l/min
Connection	3/4"-16UNF
Sound level	92db
Adapter plug	SDS Max
Vibration level	9 m/s²
Length	640 mm
Weight	14 kg

## **OPERATING INSTRUCTIONS FOR UNDERWATER TOOLS:**

**BEFORE** underwater operation:

- Test the machine for leakage
- Test all functions of the machine (drilling, blowing, all moving parts, valves)
- Spray all moving parts with lubricant OKS 8601 (or similar)

## AFTER underwater operation:

- Clean the machine
- Dry the machine with compressed air
- Spray all moving parts with lubricant OKS 8601 (or similar)
