

MIKO Permanent Lifter Magnets is a series of switchable magnets with a wide lifting capacity. The magnets comes in two different types for dry and wet use. They have a wide range of applications from moving iron blocks, cylindrical objects, temporary fixing of lifting bags for wreck removals.

All magnets are delivered with a stainless steel shackle as lifting point. The magnetic force is switched on by rotating a lever. An operator activated button for safe release of magnetic force at the top of lever.
