

Selection & Specification Data

Product Name Mascoat WeatherBloc-HRC

MWB-HRC Product No.

Description Mascoat WeatherBloc-HRC is a water-

based acrylic reflective coating comprised of air-encapsulated, insulating particles that produce thermal insulation qualities. It is specifically designed for rooftops. warehouses, barns, storage areas, mobile homes, portable buildings, containers,

coolers, walls and sheds.

 Excellent thermal insulation at low thickness **Features**

♦ Excellent solar reflectance

Excellent application characteristics

Fast recoat times

Helps deaden sound

◆ Applies to almost any surface

Helps to seal walls and membranes

Ultra-low VOC content

Water-based Acrylic Insulation Coating **Base**

Flat **Gloss**

Self priming over non-ferrous materials **Priming**

(stainless steel & aluminum). Primer is required for carbon steel substrates.

Storage Do not subject wet coating in pail form to

freezing conditions. Coating should be kept in a warehouse between 15°C and 35°F

(60°F-95°F).

Substrates & Surface Protection

Surface should be clean, dry, and free of foreign **Surface Prep**

matter. Surface prep can be used to NACE 1-3

(SSPC SP 5-6) when applicable.

Ferrous Should be primed prior to application of MWB-**Surfaces**

HRC Insulating Coating.

Non-ferrous The coating can be applied directly to non-**Surfaces**

ferrous surfaces.

Concrete and Cement **Surfaces**

Surface should be fully cured prior to application of MWB-HRC. Due to the porous nature of concrete/cement, coverage rate variations should be taken into account prior to application. A sealer can be applied prior to WB-HRC, but sealer manufacturer instructions for topcoating

should be followed.

Application Equipment

Airless Sprayer Pump Ratio: 33:1 or larger

Output per Cycle: 180cc (Minimum)

290cc (Optimum)

Volume: 1.5 gpm (5.7 lpm) or greater

Hose: 3/8" or larger with no more

than 3' of 1/4" whip. 1/2" hose recommended for length above 50'.

Tip Size: 0.017" (for tight spots)

0.019-0.023" (Normal use)

Pressure: Minimum of 3000 PSI

Small Spray Application

Please consult Mascoat for the Small Application Sprayer. This sprayer is excellent

for small applications and touch-ups.

Brush or Roll Not recommended for this coating

Application Conditions

Surface Temperatures Surface temperatures for applications should be greater than 60°F (10°C). Lower surface

temperatures will increase dry times.

Ambient & Cold (60°-120°F, 15°-49°C): For **Applications**

temperatures (surface or ambient - whichever is lower), an initial tack coat is recommended of 10 mils (0.25 mm or 250 microns). This tack coat will help eliminate sag on vertical wall applications. Tack coat should be dry to touch prior to next pass. Coating can be reapplied after each coat

is thoroughly dry.

Hot (>140°F, >60°C): Not recommended

Application Thickness

Product can be applied in successive coats to increase insulation ability. There are no upper

limitations.

Dryfall Dryfall within a 10 ft radius.

Mixing & Thinning

Mixing Only a mud mixing paddle should be used.

> Use 1/2" drill motor to stir contents with paddle. Make sure drill is set to reverse to ensure that the paddle will not mar the bucket's inner wall. Please consult Mascoat for paddle, if needed.

DO NOT MECHANICALLY SHAKE.

Thinning DO NOT THIN unless authorized in writing by

Mascoat.

Pot life Coating is one part, so no catalyzation is

needed. Pail can be reused if properly sealed.

Dry times are based on 0.5 mm (20 mil) coats. Thicker coats may require longer dry times. Use 90° thumb test or moisture meter prior to recoat. This is the estimated dry time for 15-20 mils (0.38-0.50 mm) of Mascoat WeatherBloc-HRC wet. Dry time may vary depending on other conditions such as wind or enclosed environments. Lighter thickness passes will expedite dry times. Forced ventilation in confined areas will also expedite dry times.

Cleanup & Safety

Cleanup Equipment may be cleaned with soap & water.

>100°F (>37°C)

For minimum protection, Mascoat recommends Safety an N95 particulate respirator mask. For additional

protection, a half mask respirator with organic vapor cartridge can be utilized. Eye protection recommended due to spray application method.

14-16 hrs

Ventilation Recommended for constricted areas.

Caution This material is not for human consumption. Clothing Safety clothing & gloves are recommended.
