

Emery Cloth Pferd Germany

Pferd Emery Cloth SBR A on rolls

Pferd VSM brown cloth backed shop rolls variant is suitable for universal, heavy-duty use on alloyed and non-alloyed steels, as well as non-ferrous metals. The carton has a tear-off edge for separating the sections of abrasive belt at the workplace.

Applications are: Roughening, Surface work, Cleaning, Step-by-step fine grinding.

Optimum adaptation to contours thanks to high flexibility. Low wear thanks to high tear strength and very high grain adhesion. Abrasive material Aluminium Oxide A.

Roll length = 50 mtr.

Pferd KSS-NET Velcro-backed abrasive discs

Velcro-backed abrasive discs in the NET type feature a netting fabric, to which the aggressive grain is bonded with a high-performance bond system, which makes it very durable. High stock removal rate and very long tool life.

Abrasive material Aluminium oxide A.

Very fine, even surfaces can be achieved.

Dust-free work thanks to good extraction capability.

No clogging thanks to netting structure.

Durable netting structure with high tear strength and edge stability.

For aluminium, additional non-ferrous metals, stainless steel (INOX), wood, plastics, steel and cast steel.

For roughening, surface grinding, cleaning, step-by-step fine grinding.

For use in combination with eccentric orbital sanders.

Packed per 25 pcs

Pferd Abrasive Spiral bands

The comprehensive range of abrasive spiral bands offers the best tool solution for every application, from fine grinding through to aggressive grinding.

Matching, reusable rubber drum holders in two different shapes are available for using abrasive spiral bands: Cylindrical en Conical.

Abrasive spiral band fits securely on the rubber drum holder as the holder expands during use.

Outstanding tool life thanks to special manufacturing process – even under the toughest work conditions.

Highest possible profitability thanks to particularly high stock removal and aggressiveness of the abrasive.

Applications are: Roughening, leveling, deburring, surface work, work on edges, sharpening, work on weld seams, step-by-step fine grinding.

To use on flexible shaft drives and on straight grinders (die-grinders).

Available in Aluminium oxide A, Zirconia alumina Z, Zirconia alumina COOL, Ceramic oxide grain CO-COOL in many dimensions and grit sizes.

Contact us for the full catalogue with all possibilities.
