

Flexible work lighting GIFAS LED light strip IP65

Gifas FlexLED

Flexible LED Strip for **illumination on both sides**. Energy saving alternative for temporary illumination of work side. No shadows which is a big benefit in compare to spot lights. The FlexLed can easily be installed to ceilings, walls, stairways etc. and provides an optimum illumination. Installation is fast and easy what is a huge benefit using temporary illumination. The LED strip is covered by a high performance, durable, clear, flexible PVC tube. This provide the user more flexibility and a higher light output. The FlexLED is IP65 and can be used indoor and outdoor as well. The FlexLED is 25 meter and comes ready for use on a cable reel with 1.5 connection cable with Euro plug. The FlexLED can be extended up to max. 100 meter. The new 10 meter FlexLED is supplied on a simple plastic reel.
