

## Pliers and screwdrivers ESD

### Ega Master Mini ESD Pliers

EGA Master ESD products dispose of the electrostatic energy in a safe and controlled way for the user and electronic components. That makes them the perfect tools for electronic applications. Suitable for working with electronic equipment thanks to their small size. They are designed for gripping, bending, cutting or any work where great precision is needed. Made in high quality Cr-V steel they have superb mechanical properties and high precision cutting edges. The bi-material handles ensure the dissipation of the static charge on a safe and controlled way apart from allowing a good ergonomic grip. Double spring with smooth operation for an easy steady opening. ISO-DIN-9655 UNE-16544.

**ESD**  The Electro Static Discharge, ESD, is an electrostatic phenomenon which makes a sudden and momentary electrical current flow between two different objects with different electrical potential.

**Safety advice: Do not confuse ESD tools with insulated ones. ESD tools should not be used with components subject to electrical voltage.**

### Ega Master Anti-Static Wrist Strap ESD

The anti-static ESD strap allows you to safely work in electrostatic protected areas. It sends all body static charge to the ground, suitable to work with delicate electronic devices without any risk of damage.

### Ega Master Electrician Mini Screwdrivers ESD

The ESD Screwdrivers are available as slotted in mm and inch, Phillips, Pozidrive, Torx and Tamper Torx. The screwdrivers are suitable for working with electronic equipment thanks to their small size. The rods are made in high quality al Cr-V steel. The tips have a matt chrome finish and offer high precision and durability thanks to a mechanized manufacturing process. The bi-material handles ensure the dissipation of the static charge on a safe and controlled way apart from allowing a good ergonomic grip.
