

Lifting Equipment Drum Carriers

Estil Mobile Drum Lifter and Carrier MVL

The MVL is a universal tool for lifting, tilting and moving of barrels. The barrel is secured with a chain and lever. A positioning pin makes it possible to position the barrel both horizontally and vertically, making it possible to pour the liquid over. Because the barrel hangs balanced in the lifter, it can be maneuvered into any position with a minimum of force. The MVL is very stable due to the two large polyurethane wheels and steering wheel.

| Article No. | Type | Capacity Tons | Barrel diameter max mm | Barrel Height min mm | Lifting Height max mm | Weight kilo | IMPA |
|-------------|-------|---------------|------------------------|----------------------|-----------------------|-------------|----------|
| 641025 | MVL30 | 0.25 | 572 | 875 | 340 | 40 | 61 71 93 |

Estil Hydraulic Mobile Drum Lifter and Carrier HVT

The HVT is a hydraulic mobile drum carrier used to easy pick up and move drums up to 250 kilo. Very stable due to the two large polyurethane wheels and steering wheel with brake. Very light to use and equipped with a automatic gripping clamp. The maximum lift height can be reached with 16 strokes.

| Article No. | Type | Capacity Tons | Barrel diameter max mm | Barrel Height min mm | Lifting Height max mm | Weight kilo | IMPA |
|-------------|-------|---------------|------------------------|----------------------|-----------------------|-------------|----------|
| 641026 | HVT25 | 0.25 | 572 | 875 | 340 | 40 | 61 71 93 |

Estil Hydraulic Mobile Drum Lifter and Carrier EVPW30

The EVPW is a hydraulic mobile drum pallet truck used to easy pick up and move drums of 210 liters. Ideal for moving barrels just as quickly with only one person. When lifting the pallet truck the drum clamp first clamp around the drum, then lifting movement will take place and for putting down the sequence is reversed. The unique construction of the truck makes it easy to operate.

| Article No. | Type | Capacity Tons | Steel Drum Type | Barrel Height min mm | Lifting Height max mm | Weight kilo | IMPA |
|-------------|--------|---------------|-----------------|----------------------|-----------------------|-------------|----------|
| 641027 | EVPW30 | 0.3 | 210 ltr | 270 | 390 | 53 | 61 71 93 |

IMPORTANT NOTE

Each user must check the tool before using on safety and functionality. Check before using the wheels and frame on damaging or wear. Check the pump unit to be sure it works properly.

Every Hydraulic pallet truck and stacker is supplied with a CE confirmation.

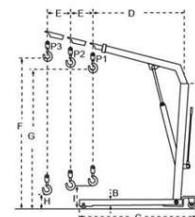

Optional to order is an extra lifting equipment certificate, article 66CF1005.

Lifting Equipment Folding Workshop Crane

Estil Foldable workshop crane EVW

The EVW foldable workshop crane is specifically developed to meet the demand of trade- and transport companies and is extremely suitable for every workshop due to it's mobility. Even when folded, the crane can be operated by means of two swivel castors, which are attached to the extended solid bottom plate and is easy to move. Due to the special construction the crane is suitable for many purposes even the heaviest. The crane has an hydraulic system with a double-acting pump. Lowering takes place via a rotary movement on a special safety valve. The crane is available with a capacity from 0,5 up to 2,0 Ton.

| Article No. | Type | Capacity Tons | Cap P1 Tons | Cap P2 Tons | Cap P3 Tons | Length C mm | Weight kilo | IMPA |
|-------------|--------|---------------|-------------|-------------|-------------|-------------|-------------|------|
| 667060 | EVW-05 | 0,5 | 0,5 | 0,425 | 0,35 | 1510 | 75 | - |
| 667061 | EVW-1 | 1,0 | 1,0 | 0,8 | 0,7 | 1630 | 115 | - |
| 667062 | EVW-2 | 2,0 | 1,0 | 1,7 | 1,5 | 1900 | 165 | - |

Lifting Equipment Forklift Truck Traverse

Forklift Truck Traverse

Forklift traverse with hook to pick up objects that have no space underneath. Due to the compact solid construction and low building height, a safety swivel hook makes exact positioning possible.

| Article No. | Type | Capacity Tons | A mm | B mm | C mm | Total Width mm | Weight kilo | IMPA |
|-------------|--------|---------------|------|------|------|----------------|-------------|------|
