

Lifting Equipment Hydraulic Hand Pallet Trucks

Estil Hydraulic Hand Pallet Truck EPWQ

Can be lift to maximum height with only 6 strokes. Heavy duty hydraulic pump unit with pressure relief valve. Massive steel tandem wheel set with circulation rolls for a better movement on unevenness floor. Plastic wheel on the lower end of the fork. Ergonomic lever handle covered with rubber and triangle construction for added strength. Front wheels and steering wheels with a polyurethane cover and a solid bearing system for smooth and silent movement. Several lubrication points on turning parts for easy maintenance. Possibility to lower the load slowly.

Article No.	Type	Capacity Tons	Fork Dimensions L x W mm	Lifting Height min mm	Lifting Height max mm	Fork leg width mm	Weight kilo	IMPA
667000	EPWQ25	2,5	1150 x 540	85	200	160	75	61 71 96

Estil Hydraulic Hand Pallet Trucks EPW

Heavy duty hydraulic pump unit with pressure relief valve. Massive steel tandem wheel set with circulation rolls for a better movement on unevenness floor. Plastic wheel on the lower end of the fork. Ergonomic lever handle covered with rubber and triangle construction for added strength. Front wheels and steering wheels with a polyurethane cover and a solid bearing system for smooth and silent movement. Several lubrication points on turning parts for easy maintenance. Possibility to lower the load slowly.

Article No.	Type	Capacity Tons	Fork Dimensions L x W mm	Lifting Height min mm	Lifting Height max mm	Fork leg width mm	Weight kilo	IMPA
667001	EPW25	2.5	1150 x 540	85	200	160	75	61 71 97

667008	EPW50	5	1150 x 540	85	200	160	190	-

Estil Hydraulic Hand Pallet Trucks EPWK

Especially designed for use in trucks and in limited spaces. 210 degrees radius, very small turning circle. Heavy duty hydraulic pump unit with pressure relief valve. Massive steel tandem wheel set with circulation rolls for a better movement on unevenness floor. Plastic wheel on the lower end of the fork. Ergonomic lever handle covered with rubber and triangle construction for added strength. Front wheels and steering wheels with a polyurethane cover and a solid bearing system for smooth and silent movement. Several lubrication points on turning parts for easy maintenance. Possibility to lower the load slowly.

Article No.	Type	Capacity Tons	Fork Dimensions L x W mm	Lifting Height min mm	Lifting Height max mm	Fork leg width mm	Weight kilo	IMPA
667003	EPWK25	2.5	800 x 540	85	200	160	75	61 71 97

Estil Hydraulic Hand Pallet Trucks EPWL

Heavy duty hydraulic pump unit with over pressure valve. 210 degrees revolving, very small turning circle. Several lubrication points on turning parts for easy maintenance. Ergonomic lever handle covered with rubber and triangle construction for added strength. C-profile wheels pressed out of one piece for extra stability. Steering wheels of polyurethane and fork rolls of steel. Due to the **extreme low height** ideal for low pallets such as pallets with bricks or stones.

Article No.	Type	Capacity Tons	Fork Dimensions L x W mm	Lifting Height min mm	Lifting Height max mm	Fork leg width mm	Weight kilo	IMPA
667004	EPWL10	1	1120 x 530	35	90	160	69	-
667006	EPWL20	2	1150 x 540	51	165	160	75	61 71 96

Estil Hydraulic Hand Pallet Lifter Trucks EPWH

Special high lifting pallet truck.

Heavy duty hydraulic pump unit with pressure relief valve. Telescopic 3-stage cylinder for light and easy operation. Lifting fast 40 mm per stroke, at full load 15 mm. Automatic stabilizer which automatic prevent the truck for driving after lifting approx. 30 cm, this function makes a better stability. Ergonomic lever handle covered with rubber and triangle construction for added strength. Fork rolls and steering wheels covered with polyurethane and a solid bearing system for a smooth and silent movement. Several lubrication points on turning parts for easy maintenance.

Article No.	Type	Capacity Tons	Fork Dimensions L x W mm	Lifting Height min mm	Lifting Height max mm	Fork leg width mm	Weight kilo	IMPA
667007	EPWH15	1,5	1170 x 540	82	800	160	127	-

Estil Hydraulic Hand Pallet Trucks EPWG

Galvanized hand pallet truck. For use in areas where standard pallet trucks easy corrode. Heavy duty hydraulic pump unit with pressure relief valve. Massive steel tandem wheel set with circulation rolls for a better movement on unevenness floor. Plastic wheels at the end of the forks. Lever handle and triangle construction for added strength. Fork rolls and steering wheels of nylon, solid bearing system for a smooth and silent movement. Several lubrication points on turning parts for easy maintenance. Possibility to lower the load slowly.

Article No.	Type	Capacity Tons	Fork Dimensions L x W mm	Lifting Height min mm	Lifting Height max mm	Fork leg width mm	Weight kilo	IMPA
667009	EPWG20	2	1150 x 540	85	200	160	75	61 71 96

IMPORTANT NOTE

Each user must check the tool before using on safety and functionality. Check before using the wheels and frame on damaging or wear. Check the pump unit to be sure it works properly.

Lifting Equipment Hydraulic Hand Pallet Trucks

Estil Hydraulic Hand Pallet Trucks EPWR

Stainless Steel hand pallet truck. For use in food industry, fishing industry, shops etc. Heavy duty hydraulic pump unit with pressure relief valve. Massive steel tandem wheel set with circulation rolls for a better movement on unevenness floor. Plastic wheels at the end of the forks. Lever handle and triangle construction for added strength. Fork rolls and steering wheels of nylon, solid bearing system for a smooth and silent movement. Several lubrication points on turning parts for easy maintenance. Possibility to lower the load slowly.

Article No.	Type	Capacity Tons	Fork Dimensions L x W mm	Lifting Height min mm	Lifting Height max mm	Fork leg width mm	Weight kilo	IMPA
667010	EPWR20	2	1150 x 540	85	200	160	95	61 71 96

Estil Hydraulic Hand Pallet Trucks EPWW

Weighing hand pallet truck. Heavy duty hydraulic pump unit with pressure relief valve. Equipped with 4 sensors for an optimal weighing. Capacity of 2.000 kilo in steps of 1 kilo, deviation 0,1% possibility of counting the cargo, makes it possible to show always the total sum of the cargo. Standard supplied with 4 AA batteries, approx. 65 hour runtime, Auto switch of after not using the unit for 3 minutes. Weighing unit protected IP65, provided with 18 mm LED. Ergonomic lever handle covered with rubber and triangle construction for added strength. C-profile forks pressed out of one piece for extra stability. Steering wheels and fork wheels of polyurethane. Also available with build in printer, article No. 667016

Article No.	Type	Capacity Tons	Fork Dimensions L x W mm	Lifting Height min mm	Lifting Height max mm	Fork leg width mm	Weight kilo	IMPA
667015	EPWW20	2	1150 x 572	82	200	182	115	-
667016	EPWW20P	2	1150 x 572	82	200	182	120	-

Lifting Equipment Hydraulic Hand Pallet Stackers

Estil Hydraulic Hand Pallet Stacker EHS

The EHS hand hydraulic stacker is a maintenance friendly tool and is easy to use, fitted with a hydraulic pump unit makes it possible to lift very heavy loads up to big heights and makes it also possible to lower the load extreme slowly. With this stacker no empty space stays unused. A brake keeps the EHS stacker stabil on its place during the lifting process. Big handles gives a good grip and control of the truck. Two fork rolls and two steering wheels are mounted in the frame. Rolls and wheels are polyurethane and with heavy and solid bearings.

Article No.	Type	Capacity Tons	Fork Dimensions L x W mm	Lifting Height min mm	Lifting Height max mm	Total Height mm	Weight kilo	IMPA
667029	EHS1015	1	1150 x 540	1500	88	1970	220	-
667030	EHS1025	1	1150 x 540	2500	88	1970	330	-

IMPORTANT NOTE

Each user must check the tool before using on safety and functionality. Check before using the wheels and frame on damaging or wear. Check the pump unit to be sure it works properly.

Lifting Equipment Pallet Lifting Hooks

Estil Pallet Lifting Hooks EZPH

Estil Pallet hooks are used to move pallets horizontally and vertically in a simple way with a crane or hoist. Due to the diversity and the many adjustment options of the pallet hooks it is possible to grab all types of pallets. The pallet hooks of the EZPH series are balancing which will come in at 20% of the full load. When unloaded both forks hang horizontally. The pallet hook is adjustable in height and the fork distance is adjustable in width. The strapping chain prevents load from falling off during shock or impact of the load. The Estil pallet hook saves on unloading time and the risk of breakage and/or damage is reduced to a minimum.

Article No.	Type	Capacity Tons	Fork Dimensions L x W x H mm	Useful Height mm	Building Height max mm	Fork adjustment width mm	Lifting eye mm	Weight kilo
667039	EZPH1	1	1000x100x40	1000-1600	1420-1920	350-900	100x80	140
667040	EZPH2	2	1000x100x40	1300-2000	1655-2355	400-900	100x80	220
667041	EZPH3	3	1000x120x50	1300-2000	1720-2420	450-900	120x100	280
667042	EZPH5	5	1000x150x60	1300-2000	1850-2650	530-1000	136x120	380

Estil Pallet Lifting Hooks ZBPH

The ZBPH pallet hooks are **100% balancing with any load**. This means that the load is guaranteed to always hangs exactly horizontally. Estil pallet hooks are used to move pallets horizontally and vertically in a simple way with a crane or a hoist. Due to the diversity and many adjustment options of the pallet hook, it is possible to grab all types of pallets. The pallet hook is adjustable in height and the fork distance is adjustable in width. The strapping chain prevents load from falling off during shock or impact of the load. The Estil pallet hook saves on unloading time and the risk of breakage and/or damage is reduced to a minimum.

Article No.	Type	Capacity Tons	Fork Dimensions L x W x H mm	Building Height mm	Useful Height max mm	Fork adjustment width mm	Lifting eye mm	Weight kilo
667043	ZBPH18	1.8	930x100x80	1780	1200	340-940	NA	140

IMPORTANT NOTE

Each user must check the tool before using on safety and functionality. Check before using if bolts are secured and frame on damaging or wear. Check the lifting eye before starting the lift.

Every pallet lifting hook is supplied with a CE confirmation.

Optional to order is an extra lifting equipment certificate, article 66CF1005
