

## Pentair Foodservice Drinking Water Filters

### Pentair special filters for potable water

Special carbon filters for extended reduction of chemical and mechanical contaminants and can be connected direct under the tap. When you use HADEX in the drinking water system a active carbon filter cannot be used because it removes the HADEX out of the water and destroy so the effect of the HADEX. This is what you want to prevent. The disadvantage is the drinkwater what comes out of the tap has a slight chloride taste. Especially for this we offer this exclusive precoat filtration provides superior chlorine taste & odor reduction and microfilters dirt and particles as small as 1/2 micron in size by mechanical means.

You will get very tastefull drinking water.

At average use the lifetime of the filter cartridge is between half a year to one year.

Installation is quick and easy. The system contains a filter head with 2x 3/8" BSP connections (which makes it easy to connect it between tap and drinking water pipe) and a filter cartridge.

The filter head is equipped with a mounting bracket for wall installation.

Install vertically with cartridge hanging down.

### Pentair head QL3 (single) MARITIME

With 3/8" BSP connections

Everpure 4312-12

Including water shutoff valve

All wetted parts have past the NSF extraction tests.

Will not corrode.

## HADEX Water Disinfectant

### HADEX food grade quality water disinfectant

A safe, effective and easy product.

Hadex is especially intended for disinfecting drinking water tanks and piping systems, and for preserving drinking water in tanks.

Hadex is a liquid product, which disperses rapidly through the water to be treated.

The water treated with Hadex remains suitable for consumption, which prevents water being wasted and saves time and money.

Hadex is permitted in the Netherlands by the Ministry of Health, Welfare and Sport under permit number 9574N. The Shipping Inspectorate has fully accepted Hadex.

Read carefully the user instructions on the package before use.

Article No.	Description
975897	Hadex 30 ml. drop bottle for 1.250 ltr water
975902	Hadex 250 ml. dosing bottle for 12.500 ltr water
975898	Hadex 1,0 liter bottle for 50.000 liter water
975899	Hadex 2,5 liter jerrycan for 125.000 liter water
975900	Hadex 10,0 liter jerrycan for 500.000 liter water
975901	Hadex 25.0 liter jerrycan for 1.250.00 liter water

### HADEX Test kit

The Hadex test kit is a complete and handy colour-based system that is very easy to use to check the quantity of free active Hadex in your drinking water.

The test kit has a measuring range of 0-2mg/ltr.

The kit contains: 1 test unit, 1 color disc, 2 test tubes 10ml, 1 stirrer, 30 DP1 tablets, 30 DP3 tablets, manual, storage box.

Article No.	Description
975905	Hadex Test kit complete
975910	Hadex DP1 tablets box 100 pcs
975911	Hadex DP3 tablets box 100 pcs
975913	Hadex Test color strips pack 50 pcs
