

## Deck Grip Strips Swiss Solutions

### Swiss Solutions Deck Grip Strips

Our heavy duty GRP Deck Grip Strips are the quick and easy solutions for dealing with the slip issues associated with standard timber decking. The strips are simply screw fixed on to the existing timbers, through the pre-drilled holes, using the su table screws provided. Traditional timber decking can be extremely slippery underfoot. The addition of the heavy duty GRP Deck Grip Strips offers an instant remedy with its slip resistant surface.

### Suitable applications are:

Public decking areas, private decking areas, marinas.

### Product characteristics are:

Anti slip top surface, Quick and easy to install, Choices of colours, extreme hard wear surface, chamfered edges for safety, choices in widths, choices of sizes, no scrap value, includes pre-drilled holes, includes decking screwfixings (zinc plated)  
(stainless steel available at additional cost)

### Pre-drilled holes configuration:

All holes are 6mm diameter and the end holes are 50mm from the edges. For the 120mm strips there are two rows of holes, each row is 30mm in from the chamfered edges.

The strips are available in a width of 50mm, 90mm and 120mm and length of 1200 and 2400mm.

The colours are Black, Safety Yellow and Stone. Choice in Fine and Coarse Grit surface, for indoor and outdoor applications.

Thickness is 3mm with camfered edges.

Made from ortho resin as standard. Different chemical resistance available.

Made via pultrusion method.

Service temperature from -20 to 80°C.

For extra info see our website for the full datasheet.
