

## Flat Sheets HD Swiss Solutions

### Swiss Solutions Flat Sheets Heavy Duty

The Heavy Duty Anti Slip Sheets offer superior slip resistance for both interior and exterior use. Made from durable and lightweight GRP, and with a superior grit, they are twice as hard wearing as the industry standard. They are also chemical resistant, providing the perfect solution for potentially hazardous areas. The low profile GRP construction is produced by the pultrusion method, which protects from bending, warping or splitting over time.

#### Suitable applications are:

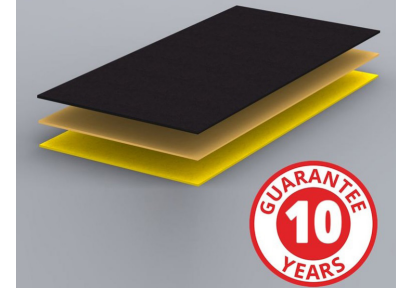

Standard: Ramps, walkways, mezzanine floors, Fire escapes and areas of heavy food traffic.  
Decorative: Internal ramps. It can be applied on wood, metal, stone and concrete substrates.

#### Product characteristics are:

Highly durable anti slip flat sheet surface for walkway use. Short delivery time several sizes available. Easily combines with Stair Tread Covers.

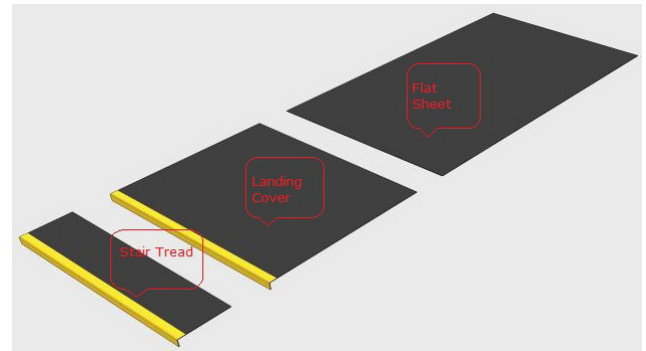

#### Standard sizes are:

800x1200mm, 1200x1200mm, 2400x1200mm.  
Thickness of the profile is 5/7mm. Service temperature -20°C to 80°C.  
Fire retardant: ASTM D 635, non sparking, non metallic, impact resistant, chemical resistant.  
Available colours: Black, Grey, Yellow and Stone.  
The sheets are made from GRP via pultrusion method.  
For extra info see our website for the full datasheet.

## Slip Flexi Lite Sheets Swiss Solutions

### Swiss Solutions Flexi Lite Sheets

The Swiss Solutions Slip Grip Flexi Lite flat sheets are only 1mm thick and are ideal for areas where an exposed edge of a thicker flat sheet might present a trip hazard. The sheets can be fixed to a floor by machinery or in a doorway etc. and not present a trip hazard or where less flexible sheets aren't suitable. The sheets can be used undulating walkways and ramps, or surfaces that are not perfectly flat. Flexi Lite offers total manoeuvrability, but is still strong, so won't crack. The resins are flexible, and combined with the 1mm thickness allow the product to be fixed to an undulating surface. The sheets are not suitable for mechanical fixing and should be fixed using a SP350 Fix and Seal High Tack Adhesive. The sheets are available in black, yellow and white. They can easily be trimmed to the required dimensions.

#### Suitable applications are:

Ramps, Walkways, mezzanine floors. It can be applied on wood, metal, stone and concrete substrates.

#### Product characteristics are:

Low profile - no trip hazard. Ideal for laying down in doorways, around oily machinery or on floors that are prone to getting wet. Available in 3 colours. Surface is coarse grade

#### Technical data:

Thickness of the profile is 1mm. Service temperature -20°C to 80°C.  
Non sparking, non metallic, chemical resistant, light weight.
