

Ladder Rung Grip Swiss Solutions

Swiss Solutions Ladder Rung Grip

The Swiss Solutions Rung Grip is designed specifically to fit over traditional round steel ladder rungs, Rung Grip enhances ladder safety by enlarging the surface area for foot contact and friction co-efficiency with its integral grit surface. Constructed from durable chemical resistant fiberglass, Run Grip is capable of withstanding the busiest environments and will resist chemical attack from corrosive fluids transferred from the sole of the boot.

Suitable applications are:

Marinas, Power Stations, Industrial stairs, Military

Product characteristics are:

Slip resistant top surface. Impact resistant. Fire retardant option. Corrosion resistant. Lightweight. Non Sparking. Non Metallic. Tough and durable. Choice of sizes. Quick installation.

Standard sizes are:

300mm, 400mm, 600mm, 1200mm. Thickness 4mm.

For ladder rung profile 25x25mm and 38x38mm.

Thickness of the profile is 4mm. Service temperature -20°C to 80°C.

Made from ISO Resin, non sparking, non metallic, impact resistant, chemical resistant.

The profiles are made from GRP via pultrusion method.

For extra info see our website for the full datasheet.
