

Stair Tread Covers HD Swiss Solutions

Swiss Solutions Stair Tread Covers Heavy Duty

The Swiss Solutions Stair Tread Covers Heavy Duty offer a superior slip resistance for both interior and exterior use. Made from durable and lightweight GRP, and with a superior grit, they are twice as hard wearing as the industry standard quartz. They are also chemical resistant, providing the perfect solution for potentially hazardous areas. The low profile GRP construction is produced by the pultrusion method, which protects from bending, warping or splitting over time. The Stair Tread Covers comprise of a high quality composite of glass woven matting impregnated with isophthalic polyester resin.

Suitable applications are:

Fire escapes, all staircases and areas of heavy foot traffic. Internal ramps and staircases. It can be applied on wood, metal, stone and concrete substrates.

Product characteristics are:

Highly durable anti slip surface for heavy use. UK DDA and building regulations compliant. Available in lengths up to 3 mtr and can be easily cut in required dimensions. Short lead times. Many colours and sizes available.

Standard lengths are:

600, 750, 800, 1000, 1200, 1500, 2000 and 3000mm.

Stair nosing profile 345mm x 55mm

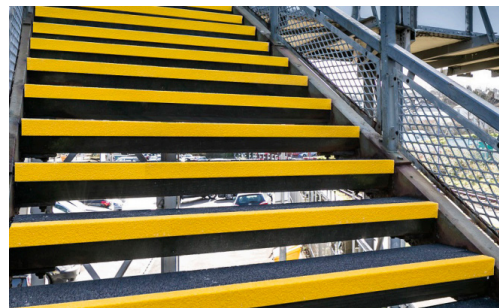

Thickness of the profile is 3-4mm. Service temperature -20°C to 80°C.

Fire retardant: ASTM D 635, non sparking, non metallic, impact resistant, chemical resistant.

Available colours: Black with Yellow nose, Grey with Yellow nose, Stone with Stone nose, Stone with White nose, Black with White nose.

The profiles are made from GRP via pultrusion method.

For extra info see our website for the full datasheet.

Stair Riser Plates Swiss Solutions

Swiss Solutions Riser Plates Heavy Duty

The addition of Riser Plates means that not only is the whole tread covered but the riser is completely covered offering a visually enhanced appearance. Like the Stair Treads, the Riser Plates are made from Fiberglass materials so will not rot, twist or warp. The front surface has a smooth finish.

Suitable applications are:

Fire escapes, all staircases and areas of heavy foot traffic. Internal ramps and staircases. It can be applied on wood, metal, stone and concrete substrates.

Product characteristics are:

Fully covers the existing riser substrates. Visually transforms existing staircase. Constructed from high strength fiberglass. Maintenance free. Quick and easy installation.

Choice of widths. Easily combines with Stair Tread Covers.

Can be cut in required dimensions.

Standard lengths are:

600, 750, 800, 1000, 1200, 1500, 2000 and 3000mm.

Panel height size 145mm colour black

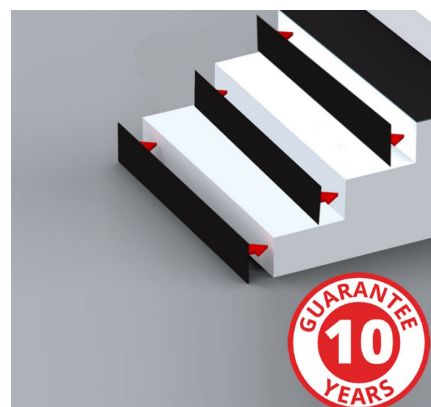

Thickness of the profile is 3-4mm. Service temperature -20°C to 80°C.

Fire retardant: ASTM D 635, non sparking, non metallic, impact resistant, chemical resistant.

The profiles are met from GRP via pultrusion method.

For extra info see our website for the full datasheet.
