

**Rain caps for exhaust pipes**

Repair Management Nederland B.V.  
More management less firefighting

For enclosing vertical exhaust pipes to prevent rain water in the engine.  
The raincap is balanced in such a way that it will open when the engine starts and is closing when the engine stops. **The raincap is made out of high quality aluminum.**  
After assembly there is no need for maintenance on the cap anymore.

**Pay attention: The dimensions are the outside dimensions of the exhaust pipe (not inner sizes)**

**Outside exhaust pipe = inside raincap.**
