

# ROYAL

Gran Crema

## Description

Royal Gran Crema is the new coffee machine for the OCS and HORECA markets, fully expressing the excellent quality of Saeco technology.

Royal Gran Crema is the perfect balance between dimensions and performances in an elegant and relatively compact shape.

The wide graphic display, designed to manage both icons and text in different languages, and the interface, equipped with easy to understand direct selection buttons, make it possible to use and program the machine easily; maintenance and cleaning operations, too, are made easy by the fact that all the parts that require regular care are removable.

Royal Gran Crema can dispense coffee and milk-based drinks, thanks to the integrated Tuono cappuccinatore, as well as hot water and steam for more expert users. The cup warmer and the powder option (for the use of pre-ground coffee) are the completion of a full coffee experience.

## Main features

- Integrated Tuono cappuccinatore
- User interface with graphic display and 8 direct selection buttons
- Wide programming menu in the local language
- Pre-ground coffee option
- Professional certification pursuant to the 60335-2-75 standard

**Technical data****Royal Gran Crema****Structural characteristics**
