

**SCANGRIP LED Headlamps for professionals**

Illuminates your entire workplace, rechargeable, long duration time, easy to operate, sensor function with touchless on/off switch. As opposed of all other headlamps providing a beam of light, the new I-VIEW and ZONE headlamps are designed to provide optimum work light illuminating your entire work area. Supplied with the newest COB LED technology, both headlamps provide an extremely powerful illumination which spreads the uniform light to the maximum and lightens up the entire field of view. You avoid turning the head to illuminate your actual workspace from a limited headlamp beam.

**I-VIEW LED headlamp**

Rechargeable I-VIEW **with touchless sensor**. Is provided with the very newest rechargeable battery technology with extraordinary long duration. When set on sensor mode I-VIEW is switched on/off only by waving a hand on front of the lamp.

**Scangrip NIGHT VIEW**

With the Night View headlamp you can choose between white and red work light. The red light is intended for work in the dark and provides light without overexposing the retinas while at the same time keeping the eyes adjusted for the dark. The red-light function is mostly known from the military but is also needed in the civilian sector for work at night, for instance on ships and offshore. On ships it is particularly useful on the bridge at night because it preserves your night vision so you can work at the control panel. Supplied with the newest COB LED technology and rechargeable battery technology with extraordinary long duration. When set on the sensor mode Night View is turned on/off only by waving a hand in front of the lamp even when wearing thick gloves.
