

Sealite Pipe Floats

Sealite pipe floats are rotationally moulded from UV-stabilized polyethylene, and can be secured around pipes, hoses and cables for use in dredging or other marine applications. Each kit comes in two halves with associated hardware, and is stackable for storage or within a shipping container for economical transportation. The units have a number of convenient features including tapered internal ends to allow the pipe to flex, and an internal anti-slip mechanism. As an option, the floats can be filled with closed-cell polyurethane foam to prevent water ingress in the unlikely event of damage.

The Pipe floats are suitable for pipe OD:  
8, 10, 12 and 24 inches.

Pipe Floats Specifications

Model	Pipe clamp OD mm/inches	Pipe clamp ID mm/inches	Suitable pipe OD inches	Length mm/inches	Mass unfoamed kg/lbs	Mass foamed kg/lbs	Total buoyancy to full submergence, unfoamed kg/lbs
