June 2012

Dear Customer

Shipping News is your chance to get the latest information from us, learn how to make a specific Wencon repair, and to get updated on the condition of the Repair Kit on board the vessel.

This time we are introducing our new Wencon Workshop in the Netherlands. Read more about this on the following pages. Below find our repair of a ballast pipe system.

Repair of ballast pipe system

1.

2.

3.

4.

Job:

1. Earlier plug's and band's were used to stop the leaking pipes, which caused a lot of efforts and problems.
2. With Wencon's flexible system, we are now able to repair even bendings and T-joints.
- 3+4. Larger holes are easily being repaired by glueing a thin steel plate in combination with reinforcement tape. The final results will resist a relativ high pressure.

5.

5. Final result. Wrapped with reinforcement tape and Wencon coating.

Loenen Repairs b.v. Rotterdam - new Wencon certified Workshop

Repair Management Nederland b.v. has been a Wencon Distributor and workshop for more than 12 years. They have now initiated a cooperation with Loenen Repairs, Rotterdam. Rene Loenen states f/w.:

“Last year in September 2011, I was contacted by Ronald van Pinxteren from Repair Management Nederland b.v. Ronald made the contact to me via LinkedIn, and we arranged a meeting at our place in Holland. Already at our first meeting it was clear, that he was looking for a new partner for the new Workshop for Wencon in the Netherlands.

Ronald was very positive about Wencon and the products as well, and since this was the first time that I learned about Wencon, I was indeed willing to learn more.

During this meeting we discussed the possibility of making a cooperation between the three companies and how we could benefit from each other. I realized that the Wencon products fit very well into our repair service, as we would now be able to make our workscope bigger than it already was.

This means that we can provide more service to our clients. We call this service cold repairs!

After several phone calls with Thomas Drost, we agreed to do a training session for six men from Loenen Repairs, in order to be a certified Engineer for Wencon.

These sessions were perfectly performed by Erik Wendelin and Ronald van Pinxteren, and we arranged a new working area in our workshop, especially for Wencon.

After the training we are now providing several repairs for our clients with great results (check our website: www.loenenrepairs.com). The clients, who visit our workshop, are very positive about the Wencon products and Wencon sample’s which were made in our workshop.

Loenen Repairs b.v. has now for 6 months, been a Wencon Workshop and it feels like a big family company. Everybody are willing to help and assist everybody”.

“For all your 24/7 service, WE TAKE CARE OF YOUR (WENCON) REPAIR”

”Rene Loenen”

New design on Wencon’s Newsletter - “Repair Case”

6-8 times per year we distribute our Newsletter “Repair Case”. This is to give you some information on how to make difficult repairs easy, as well as to keep you updated on the Wencon products.

You will get a report on a specific repair with guidance via photos and descriptions. The Newsletter is meant as an inspiration, in how to do a repair in practice.
