

Swiss Solutions Moulded Grating Fixing Clips

Creating a safer environment

Product description

Moulded Grating Fixing Clips

Swiss Solutions Moulded Grating Fixing Clips are made of Stainless Steel AISI 316L due to the corrosion resistance of the material.

The range consist 4 different types of clips.

The Clips can be used on all 3 types of Swiss Solutions Moulded Grating Panels (embedded grit top, grit top and concave top).

C Clips:

To be used to join panels together, spacing will be determined by panel thickness but assume one clip to be affixed every 500mm at an angle slot clip over the 2 load bars and twist so the clip is horizontal then screw in the bolt to threaded base of the clip and tighten.

M & L Clips:

Set out where you will position your grating clips, a guide would be in each corner and then every 500mm spaces. Push the clips into the open mesh squares so that the clip sits neatly on the load bar(s) and the base of the clip is sitting close to the bottom of the grating panel. If you are fixing directly into the existing surface, pilot drill through the hole in the clip and into the substrate the fix using the appropriate screw and plug. If you are fixing into a support frame you will need to drill through the frame and then put through bolt fitting and tightening the washer and nut underneath the frame.

J Clips:

The J Clips can be used in combination with the M clips for support from underneath.
