Anti-corrosion tape for pipes and parts.

For long term protection of metal surfaces that are underground, underwater, or exposed - even in the most severe environment. It consists of a cold applied system of petrolatum based PetroWrap Anti-Corrosion tape, Petrowrap primer and when necessary PetroWrap mastic. PetroWrap adheses to surfaces without heating even on damp and/or indifferently prepared areas.
This tapes are also used for anti-corrosion protection of machine parts during transport.

Ramnek Marine Tapes

MT201 - Ramnek Marine Tape

Is a single component, factory extruded 1,22 meter long strip of high-adhesive plastic formed to the proper cross-section between two protective wrappers, one of which is siliconen coated for easy stripping (brown paper). The other is non-removalbe clear polypropylene covering which remains in place over the adhesive to allow "foot pressure" on the tape during application. It offers the ultimate protection for water sensitive cargo and provides that extra confidence in protected cargo. It can help protect against the number one cause of cargo damage - leaking covers.
