### **VestGuard PASGT Advanced Combat Helmet**

Developed to improve wearer comfort and stability for longer periods of use without fatigue.

The helmet offers a very high level of protection against bullets and fragments in a cost effective low weight design.

The shell is made using the VestGuard's unique formula.

Layers of aramid bound in a thermoplastic resin to form the shell.

Meets and exceeds international ballistic and fragmentation protective levels. Laser cut finish ensures perfect shape and cut every time. Rubber Coated finishing strip reduces potential damage to helmet shell. Resistant to outdoor exposure,

temperatures extremes, flames and moisture and protects the helmet against decontamination after exposure to chemical agents. Design compatible with communication systems,

eyewear and night vision. Compatible with ballistic visors etc.

Four point suspension system. Real leather crown support pad.

Air gap around entire harness provides excellent ventilation and improved sweat management. Meets and exceed shock absorption to EN-397. Ideal mass distribution reduces lag during movement. Non magnetic, non corrosive parts.

Fully tested to comply with NIJ Standard STANAG 2920,

fragmentation tested. Long life guarantee.

Quick release buckle clip and removable plastic chin cup.
