WENCON Repair Kit

The Wencon Repair Kit has proven its value for many of our existing customers across the world. Latest we had the pleasure to deliver 25 Repair Kits to one of our big customer, V. Ships in Germany. V. Ships has decided to put the Repair Kit on all of their ships in Germany.

Besides we have made agreement with Hellepont Ship Management GmbH & CO in Hamburg to supply Repair Kits to all of their ships. Hellepont, Hamburg commands a fleet of 18 ships.

Both companies have, in close cooperation with Wencon, composed customised Repair Kits for their ships. Besides they made agreement for continuous refilling procedure via Wencon Distributors or Stock Points. The refilling procedure ensures that the Repair Kit is always filled up. For more information on Wencon refilling procedure, see article on next page.

Maintenance job with Wencon epoxy Coatings and Reinforcement Tape

Job:

Maintenance job performed by crew - during voyage - by using accessible tools on board. Double layer Coating and Reinforcement Tape applied wet in wet.

1. Piping heavy attacked by corrosion and therefore a permanent protection is needed.
2. Surface prepared, using Perago as alternativ to grit blasting.
3. After degreasing, first layer of Wencon epoxy and Reinforcement wrapped with 50% overlap.
4. Second and final layer.

Refilling procedure for Wencon Repair Kit

To make sure that you benefit from your investment, you must remember to refill your Repair Kit.

Wencon Repair Kit concept consists of 4 standard emergency Repair Kits. Besides you have the possibility to compose your Repair Kit yourself, or Wencon can help you to make your own customised Repair Kit, that makes your crew able to do most maintenance repairs themselves.

Twice a year, our sales department sends out a refill list for each vessel carrying a Wencon Repair Kit on board. The refill list shows the original content of the Repair Kit on board your vessel. Help yourself by reordering what has been used and check the age and

consistency of the remaining products as well. Sign up for Wencon's automatic refilling procedure by sending your emailaddress to: wenconrepairkit@wencon.com

Please see [epoxy repair kit](#) for more information.

Shelf time for Wencon products: 3 years at 20°C

WENCON Perago - the best alternativ to grit blasting

The Wencon Perago is widely used during surface preparation, and is a rotating disc for removal of rust, dirt, paint, epoxy etc. from various materials, such as steel, iron, metals, stone and concrete. The result after surface preparation with Perago is almost the same as with shotblasting, and the best way of surface preparation when blasting is not possible.

Wencon Perago Disc does not require any special machines to be in function. Mounting on a regular hand drilling machine - electric or air powered - is all it takes, to be ready for your surface preparation. The Perago Disc works significantly faster than example needle hammer or any other kind of chipping tools, and is therefore time-saving for surface preparation.

New Distributor in Hong Kong and Singapore

Wencon has made new Distributor agreement with Dan Marine, Hong Kong. Dan Marine's main business is Marine Machinery & Equipment, and they operate with satellite offices in Hong Kong and Taiwan. Dan Marine has a strong market position in Hong Kong and by this decision, we look forward to enter the Chinese market.

Wencon also made agreement with Pacific Central Teknik in Singapore. Their main business is equipment within boiler and burner services, and Pacific Central Teknik is Distributor for many known brands in Europe.

We look forward to be working with both partners.
