Dear Customer,

Spring 2013

Upgrade of Wencon UW product programme - for wet surface

By raising the viscosity and optimizing the adhesion, we have now upgraded the existing UW products. The UW products are ideal for repairing wet ballast- and cooling pipes in connection with Wencon reinforcement tape. Besides the products are ideal for “in-water” corrosion-protection of damaged hull areas. To complete the UW concept, we have added a high viscous UW putty. The UW putty is developed for repairs, where you need to apply bigger quantities in one process, for example filling up deep cavitation damages on rudder surfaces before completion with UW Cream/UW coating.

- UW Cream, green - Product no. 1014 - 0,5 kg
- UW Coating, orange - Product no. 1035 - 0,5 kg
- UW Putty, brown - Product no. 1043 - 1,0 kg

New Wencon Ceramic product line

Experiencing a growing demand in the market for products performing better against abrasion, erosion and corrosion, have lead to a new Ceramic line. Similar to the existing products the Ceramic products are offered in a thick version, designed for filling up and a fluid brushable coating for thin application. The Wencon Ceramic line is a two-component epoxy compound for repair, rebuilding and protection of deteriorated metal parts, exposed to excessive wear.

In addition to high abrasion resistance, Wencon Ceramic products also offer high temperature resistance, making it suitable for a lot of special repairs such as: Gas scrubbers, Propeller Nozzles, Rudders, Thruster tunnels, Housings, Condensers, End covers etc.

- Ceramic Cream, grey - Product no. 1016 - 1,0 kg
- Ceramic Coating, brown - Product no. 1017 - 0,5 kg
- Ceramic Coating, green - Product no. 1018 - 0,5 kg

Remember to refill your Wencon Repair Kit

The standard Wencon emergency Repair Kits number 1, 2, 3 & 4 have proven their usefulness for a large number of our clients for many years. Besides, many of our customers have realized the advantage in upgrading the kit to contain the exact type and amount of products they need. In other words: **Customised Repair Kit.**

To assemble the optimum Repair Kit for your needs, there are a few parameters to be taken into consideration - Vessel size / type & most common occurred repair challenges. You can choose to compose your Repair Kit yourself, or Wencon will be helpful to compose a kit that, makes your crew able to do most

maintenance repairs themselves.

In order to obtain maximum utilisation of your Wencon Repair Kit:

- always remember to refill your Repair Kit.

Attached find a refill list for each vessel carrying a Wencon Repair Kit on board. The refill list shows the original content of the Repair Kit on board your vessel, help yourself by reordering what has been used and check the age and consistency of the remaining products as well.
