

WENCON®

UW COATING LV FOR SPRAY APPLICATIONS

Spray, Brush, Inject
- It's Easy, Effective, Enduring

Make your time count

The Wencon UW Coating LV for Spray Application is maritime repair and maintenance redefined. With its low viscosity, the two-component epoxy is mixed directly in the application process through the cartridge gun.

The Wencon UW Coating LV is for larger areas done faster. It's for touch-ups, repairs and for precise results. Spray, brush or inject - it's easy, effective and enduring.

Suitable areas, but not limited to

- Scrubber overboard outlet/hull protection
- Sea water strainer
- Propulsion areas
- ICCP System
- Tank corrosion

SPRAY

Spray on larger areas, reduce time and manhours. For precise touch ups and repair solutions.

BRUSH

With brush on hose, just one man can reach larger areas without help from other applicators.

INJECT

Use injection for easy and effective casting of foundations.
